EXPERIENCE

Customer Relationship Management Business Analyst - TE Connectivity

OCT 2024 – Present | Bengaluru, India

- Support and manage 30+ enterprise accounts across multiple regions, providing operational insights and improving service visibility through structured reporting.
- Analyze customer and operational data to identify trends, risks, and improvement opportunities that support service excellence and customer retention.
- Develop KPI dashboards, business performance reports, and operational metrics using Power BI and Excel to support leadership decision-making.
- Drive proactive communication and stakeholder engagement, resulting in improved customer experience and more effective issue resolution.
- Collaborate with cross-functional teams and drive process improvements through root cause analysis and reporting standardization.

Customer Experience Operations Analyst, TE Connectivity

Sep 2021 – Oct 2024 | Bengaluru, India

- Managed end-to-end customer lifecycle operations for enterprise accounts, ensuring timely fulfillment and high customer satisfaction.

- Prepared operational dashboards, KPI reports, and performance summaries to support stakeholder reviews and business decisions.
- Drove workflow improvements and automation initiatives by analyzing recurring issues and operational bottlenecks.

Operations Support / Reporting Analyst, Hewlett Packard Enterprise (HPE)

Jul 2018 – Sep 2021 | Bengaluru, India

- Developed KPI dashboards and delivered actionable insights to support leadership reviews and global business operations.
- Designed standardized reporting solutions, improving data accuracy, operational visibility, and reporting efficiency.
- Streamlined reporting processes through automation and standardization, reducing manual effort.

Order Management Representative, Hewlett Packard Enterprise (HPE)

Jun 2016 – Jul 2018 | Bengaluru, India

- Managed end-to-end order processing and fulfillment activities for enterprise customers, ensuring accuracy and timely delivery
- Coordinated with Sales, Logistics, and Supply Chain teams to resolve order-related issues and improve customer satisfaction.
